

Why we walk...

We walk to help raise money for clean water 20 liters at a time.

In many parts of the world, people walk miles every day just to fill up a 20 liter jerry can with muddy, unsafe water from a stream or pond.

Nearly one billion of the world's poorest people lack access to clean water, and are forced to travel great distances to collect water from contaminated sources. As a result, water-borne diseases are the leading cause of death globally for children under the age of five, and half the patients in the world's hospitals are suffering from diseases related to unsafe water.

The money raised will help Rwandan churches build rainwater-harvesting systems and slow-sand water filters

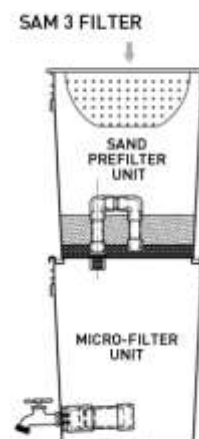

- ❶ \$20 gives 1 person access to clean water for up to 10 years
- ❷ \$140 buys a slow-sand filter that provides clean water for up to 4 families for up to 10 years
- ❸ \$3200 buys a rainwater-harvesting system to collect clean water during the rainy system for 100 families for up to 10 years.
